

CIRCLE OF LIFE PROGRAMME

Planning for Our Tomorrow

PLANNING FOR OUR TOMORROW

As an integral part of the design process, Knight Group supports policies and practices to protect our environment, conserve natural resources and reduce waste.

Knight Group is committed to helping safeguard all natural habitats and communities affected by their operations. They strive to make the most efficient and responsible use of renewable resources, including water, soil and forests.

Knight Group has developed the **CIRCLE OF LIFE™** Environmental Program to provide clients with the opportunity to dispose of furniture in a sustainable way. NZ Customs Service and Trade Me are two organisations who have used this service recently.

The **CIRCLE OF LIFE™** is a free program that involves the collection of furniture from the customer when they no longer have use for it. Items are collected and Knight Group will either donate it to a recognized charitable organisation to extend its lifecycle; or re-manufacture it as a “near-new” product. This process helps to reduce demand on raw material and energy

resources. When products are beyond salvage, they are dismantled; separated by material and sent to an approved recycler.

Choosing to build durable products that have a long-term performance and value also highlights Knight Group’s aim to place less demand on natural resources. The comprehensive Knight furniture range is a well-proven selection of office furniture that is not only designed to hold its own within a wide range of stylish office interiors, but will also consistently excel amongst the demands of a busy office - for many years after it is purchased.
